Universal adjustable bends with two pivots

Benefits compared to three-piece adjustable bends **Benefits compared to bends with a swivel joint**

- Universal bend, continuously adjustable from 0°–90°.
- The degree scale is stamped on the bend.
- The ideal angle always available.
- Ideal for the after-sales service vehicle.
- No more need for time-consuming journeys to fetch parts.
- **No contraction in the cross-section.**
- Reduced risk of blockage.
- Axial orientation retained at all angles.
- You leave expert work with the customer.
